Important Security Information

Are you transacting online safely? Knowing how to protect yourself when transacting online ensures that your data and identity are kept safe from the wrong hands. Here are some key things you can do to ensure that your accounts and information remain in your hands and no one else's.

Check Log Out Protect

Always ensure that you access your online portal account directly via the ICEA LION website and not through suspicious hyperlinks. Be on the lookout for websites that have misspellings or bad grammar in their addresses as they could be copycats of legitimate websites

When using public computers ensure that you log out from all your accounts. This will prevent cybercriminals from stealing or accessing your information. Remember to always log out when stepping away from your computer

Your password is your first line of defense. Make it complex but easy to remember, enable two factor authentication for your online accounts as this will add an extra layer of security and make it harder for an attacker to compromise your account
